

**REMARKS**

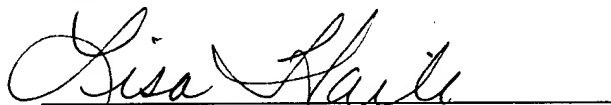

These remarks are in response to the Office Action mailed July 22, 2003. The allowance of claims 1 and 4 is acknowledged with appreciation. By the present communication, new claims 19-28 have been added to more particularly define Applicant's invention. In particular, claims 19-23 (which depend from claim 1) and new claims 24-28 (which depend from claim 4) simply define organic and inorganic phosphoric acid salts contemplated for use in the practice of the invention. Since new claims 19-23 are narrower in scope than claim 1, and new claims 24-28 are narrower in scope than claim 4, it is submitted that the proposed new claims require no additional search and raise no new issues. Accordingly, entry of claims 19-28 is respectfully requested. In addition, claims 2, 3, and 5-18 have been cancelled without prejudice to further prosecution in a divisional application claiming the benefit of priority to the present Application.

In view of the amendments presented herein, it is respectfully submitted that this application is now in condition for allowance. In the event any matters remain to be resolved, the Examiner is requested to contact the undersigned at the telephone number given below so that a prompt disposition of this application can be achieved.

Respectfully submitted,

Date:

9/19/03
